## TECHNICAL & PRODUCT SKILLS

---

**Tech Stack:** React, Next.js, Astro.js, Node.js, Angular, Jest, AWS, Cloudflare, Vercel, Robot

**Methodologies & Tools:** WCAG 2.1, CI/CD, Docker, UI/UX Design, Figma, Jenkins

**Languages:** JavaScript, TypeScript, Python, Java, SQL

## EMPLOYMENT EXPERIENCE

---

**Biorce**, Austin, TX

**Senior Frontend Developer** | April 2026 – Present

- **Founding US frontend engineer at a European MedTech AI startup**, reporting directly to the CTO and architecting the company's design system from the ground up.
- **Established the full technical architecture** for the design system - stack selection, repo setup, and component infrastructure - collaborating directly with the design team to align on requirements from day one.

**Visa**, Austin, TX

**Senior Software Engineer** | March 2023 – April 2026

- **Owned frontend architecture and cross-functional delivery for merchant-facing payment features** serving ~5,000 businesses and processing ~\$83M/month, acting as technical lead across engineering, product, and design.
- **Drove full WCAG 2.1 compliance across a high-traffic React application** - screen readers, 400% zoom reflow, semantic HTML, keyboard navigation - eliminating legal risk and meeting enterprise accessibility standards.
- **Shipped mobile-responsive payment flows** used by global merchants across Visa's acquiring network, improving usability and consistency across devices.
- **Owned monthly production releases and incident response**, executing hotfixes with zero customer impact.

**UI/UX Software Engineer** | June 2021 – February 2023

- **Built and maintained Visa's company-wide React component library**, shipped to millions of users across Visa's global product surface, including full WCAG 2.1 accessibility features - mobile reflow, screen reader support, focus management, and high-contrast themes.
- **Led a white-label UI infrastructure overhaul** enabling fully ADA-compliant brand customization, adopted by major U.S. banks including Wells Fargo and Bank of America.
- **Built end-to-end UI and database test automation** using Robot Framework and Selenium, eliminating production rollbacks and achieving 100% transaction settlement accuracy across payment networks.

**Software Engineer Intern** | Summer 2020

- **Designed and built a proof-of-concept platform to help small merchants drive sales during the COVID-19 pandemic** - React frontend consuming a Django REST API (25+ endpoints) with Visa payment integration, shipped to AWS via CI/CD.

**Schlumberger**, Houston, TX

**Software Engineer Intern** | Summer 2019

- **Developed a modular micro-frontend packaging solution in Angular** reducing go-to-market time, internal engineering overhead, and accelerating product delivery for new internal tools.

## PROJECTS

---

[abhi.work](https://abhi.work) - Personal Portfolio & UX Case Study - [github.com/avelaga/portfolio](https://github.com/avelaga/portfolio)

- **Designed and built a responsive Next.js site**, implementing SSG, performance optimizations, and CI/CD deployment to AWS S3 + CloudFront.
- **Improved load performance by 300%** and iterated on UX based analytics from 47k+ pageviews.

**pebble** - Open-Source Headless CMS - [github.com/avelaga/pebble](https://github.com/avelaga/pebble)

- **Architected a Cloudflare-native headless CMS** (Workers, D1, R2) with versioned REST API and JWT Auth.
- **Built a dedicated Next.js editor** and automated deployment tooling for rapid self-hosted setup.

[velagaadvisors.com](https://velagaadvisors.com) - Private Wealth Management Firm Site

- **Designed and developed a mobile-optimized Next.js site** on AWS with automated serverless lead capture.

## EDUCATION

---

**Bachelors in Computer Science**, *University of Texas at Austin*, May 2021

Minor in Studio Art
