EDUCATION

Bachelors in Computer Science, *University of Texas at Austin*, May 2021

Minor in Studio Art

TECHNICAL SKILLS

Languages: JavaScript, Python, Swift, SQL, TypeScript, HTML, CSS, SCSS, SwiftUI, Java, Clojure, C, C++

Tools: React/Next, Angular, Django, Flask, AWS, MySQL, Docker/Kubernetes, Figma, Robot, Selenium, Linux, Apache

Practices: Web Content Accessibility Guidelines (WCAG) 2.1, UI/UX Design, Agile Methodologies, CI/CD

EMPLOYMENT EXPERIENCE

Visa, Austin, TX

Senior Software Engineer (March 2023 - Present)

- Responsible for ownership of a merchant facing payment system. Responsibilities included upgrading the app to be WCAG 2.1 compliant, identifying and remediating existing accessibility bugs to reach 100% ADA compliance, serving as the primary point of contact for knowledge on architecture and environment, and representing the project in meetings with executives - presenting a summary of our work and bringing more awareness to the value that our project provides to other Visa products and services.
- Developed new WCAG 2.1 functionality such as screen reader notifications, reflow behaviors at 400% zoom, color contrast, DOM structure, and focusing behaviors, as well as designed and implemented mobile responsive views for public facing payment screens.
- Worked in an Agile workflow, collaborated across teams to identify, fix, and validate fixes accurately, and managed Kubernetes and Jenkins deployments of Java based API to create working environments.

UI/UX Software Engineer (June 2021 – February 2023)

- Developed WCAG 2.1 functionality in Visa's React UI library by building mobile reflow behaviors, screen reader notifications, high contrast mode, screen reader notifications, and correct focusing behaviors - ensuring full ADA compliance for applications used by Visa and major US banking institutions.
- Upgraded the white labeling functionality of Visa's UI library by leading a team of 5 software engineers and driving accessibility, styling, and logic remediations, as well as collaborating with design teams to develop UI/UX solutions, allowing major US banks to stay fully ADA compliant regardless of their branding customizations.
- Developed UI and DB test automation software with Robot Framework and Selenium that prevented bugs from going into production, reducing potential production incidents, and increasing transaction settlement accuracy to 100%.
- Represented company in recruiting events for college students and mentored students, helping them explore opportunities at Visa.

Software Engineer Intern (Summer 2020)

- Led a global team of interns with Agile workflows in developing an E-commerce POC that provides a universal curbside system for small businesses to operate with and better connect to customers.
- Designed the UI, developed a React app to dynamically load data from a Django Rest API across 25 endpoints, embedded Visa's payment system and created a CI/CD pipeline to automate the build/deploy process to AWS.

Schlumberger, Houston, TX

Software Engineer Intern (Summer 2019)

- Researched and implemented a working solution in Angular for building applications into packages and dynamically embedding into a single platform, saving internal teams months of overhead associated with launching new products.
- Developed a customizable UI that allowed on site technicians to adapt information dashboards to their needs.

PROJECTS

- [abhi.work](#)
 - Developed a responsive website with React, configured an automatic build pipeline, and deployed to AWS using a S3 bucket for storage and CloudFront for global caching.
 - Designed UI wireframes with Figma for both mobile and desktop views, with a focus on improving UX, increasing user retention, following accessibility guidelines, and more effectively presenting content based on statistical findings from site analytics.
 - Ported site to Next.js to improve site performance, implement static site generation, use dynamic metadata for each page, and increase SEO.
 - Documenting the redesign process in a [YouTube web series](#).
- [velagaadvisors.com](#) – Designed and developed a responsive commercial site using Next.js and AWS to advertise the business' financial services and acquire new clientele.
- [bandtogether.events](#) – Built a responsive web app that scrapes public data to build an information portal using React, Django, PostgreSQL, AWS, Docker, CI/CD, Selenium, Mocha, and Postman. [github.com/avelaga/band-together](#)
- [subhanjali.com](#) – Designed and developed a responsive portfolio site using React, AWS, and CI/CD.
- *Inside Skoop* – Designed and developed an iOS app that helps students find college classes using Swift, UI Kit, Django, AWS, PostgreSQL, Firebase, InVision, and Apache. [github.com/avelaga/inside-skoop-ios](#)
- Designed, built, and programmed interactive LED installations with C++ and Arduinos for [Fortress Fest](#), [DadaGeek](#), [Maker Faire](#), and [The Swan Dive](#).

INTERESTS

Music - Electric Guitar, Drums, Electric Bass, Vocals, Composition, Recording, and Production. Released three full length recordings and performed in an [official SXSW Showcase](#) and several cultural conventions with international audiences.

Photography - Conceptualized, shot, and published [two photo series](#). Featured in [Spark Magazine](#), *Rice & Spice Magazine*, *Renowned Magazine*, and *A to Z Magazine*.
