TECHNICAL & PRODUCT SKILLS

Technologies & Frameworks: React, Next.js, Astro.js, Node.js, AWS, Angular, Jest, Django, Flask, Robot, Selenium

Tools & Methodologies: WCAG 2.1, Claude Code, Agile, CI/CD, Docker, UI/UX Design, Figma, Webpack, Jenkins

Languages: JavaScript, TypeScript, Python, Java, SQL, Swift/SwiftUI, Clojure

EMPLOYMENT EXPERIENCE

Visa, Austin, TX

Senior Software Engineer

March 2023 - Present

- **Led end-to-end development of merchant-facing payment features** serving ~5,000 businesses and processing ~\$83M/month, acting as technical owner across frontend, backend, and stakeholder delivery.
- **Implemented full WCAG 2.1 compliance across a React application** (screen readers, 400% zoom reflow, semantic HTML, keyboard navigation), eliminating legal risk and meeting enterprise accessibility standards.
- **Developed and shipped mobile-responsive frontend views** for high traffic public payment flows, improving usability across devices for global merchants.
- **Maintained and deployed Java-based APIs** using Kubernetes and Jenkins, ensuring reliable CI/CD pipelines, and reducing deployment failures.
- **Owned monthly production releases and incident response**, executing hotfixes with minimal downtime and zero customer impact.

UI/UX Software Engineer

June 2021 – February 2023

- **Developed and maintained Visa's React component library**, leading WCAG 2.1 accessibility features (mobile reflow, screen reader support, focus management, high-contrast themes) used by Visa and major U.S. banks.
- **Led a project to upgrade white-label UI infrastructure**, enabling fully ADA-compliant customization across bank branding requirements.
- **Built UI and database test automation** using Robot Framework and Selenium, preventing production rollbacks, and increasing transaction settlement accuracy between various payment networks to 100%.

Software Engineer Intern

Summer 2020

- **Designed and built a React frontend** consuming a Django REST API (25+ endpoints), integrated Visa payments, and deployed via CI/CD pipelines to AWS.

Schlumberger, Houston, TX

Software Engineer Intern

Summer 2019

- **Developed a modular micro-frontend packaging solution in Angular** - reducing go-to-market time, internal engineering overhead, and accelerating product delivery for new internal tools.

PROJECTS

abhi.work - Personal Portfolio & UX Case Study - github.com/avelaga/portfolio

- **Developed a responsive React site**, built an automated CI/CD pipeline, and deployed via AWS S3/CloudFront.
- **Designed Figma wireframes** for mobile and desktop to improve content clarity, retention, and accessibility.
- **Optimized performance and SEO** by migrating to Next.js, implementing static site generation, eliminating content layout shifts, optimizing assets, and implementing lazy loading - reducing site load times by 300%.
- **Currently developing a full stack content management system** with Node.js and Postgres to manage blog posts.
- Documented product evolution through a [YouTube series](#), showcasing product development and analytics driven redesign after 47k pageviews.

velagaadvisors.com - Commercial Financial Site

- **Designed and built a mobile-optimized website** using Next.js and AWS, expanding client reach and improving business engagement.
- **Built a serverless contact form**, integrating backend email functionality for automated message delivery.

EDUCATION

Bachelors in Computer Science, **University of Texas at Austin**, May 2021

Minor in Studio Art
