TECHNICAL & PRODUCT SKILLS

Web & App Technologies: React/Next.js, Astro, AWS, Angular, Django, Flask, Docker, Robot

Tools & Frameworks: Agile, Claude Code, CI/CD, A/B Testing, WCAG 2.1, UI/UX Design, Figma

Languages & Databases: JavaScript, TypeScript, Python, SQL, Java, MySQL, Swift/SwiftUI, Clojure

EMPLOYMENT EXPERIENCE

Visa, Austin, TX

Senior Software Engineer

March 2023 - Present

- **Led end-to-end development of merchant-facing payment features** serving ~5,000 businesses and processing ~\$83M/month, acting as technical owner across frontend, backend, and stakeholder delivery.
- **Implemented full WCAG 2.1 compliance across a React-based application** (screen readers, 400% zoom reflow, semantic HTML, keyboard navigation), eliminating legal risk and meeting enterprise accessibility standards.
- **Developed and shipped mobile-responsive frontend views** for high traffic public payment flows, improving usability across devices for global merchants.
- **Maintained and deployed Java-based APIs** using Kubernetes and Jenkins, ensuring reliable CI/CD pipelines, and reducing deployment failures.
- **Owned monthly production releases and incident response**, executing hotfixes with minimal downtime and zero customer impact.

UI/UX Software Engineer

June 2021 – February 2023

- **Developed and maintained Visa's React-based UI component library**, leading WCAG 2.1 accessibility features (mobile reflow, screen reader support, focus management, high-contrast themes) used by Visa and major U.S. banks.
- **Led a project to upgrade white-label UI infrastructure**, enabling fully ADA-compliant customization across bank branding requirements.
- **Built UI and database test automation** using Robot Framework and Selenium, preventing production rollbacks, and increasing transaction settlement accuracy to 100%.

Software Engineer Intern

Summer 2020

- **Designed and built a React frontend** consuming a Django REST API (25+ endpoints), integrated Visa payments, and deployed via CI/CD pipelines to AWS.

Schlumberger, Houston, TX

Software Engineer Intern

Summer 2019

- **Developed a modular application packaging solution in Angular** - reducing go-to-market time, internal engineering overhead, and accelerating product delivery for new internal tools.

PROJECTS

abhi.work - Personal Portfolio & UX Case Study - github.com/avelaga/portfolio

- Designed and developed a responsive personal site using React and deployed with automated CI/CD pipeline to AWS S3 and CloudFront.
- Designed Figma wireframes for mobile and desktop to improve content clarity, retention, and accessibility.
- Migrated to Next.js to implement static site generation, enhance SEO, and reduce load times by ~50%.
- Documented product evolution through a [YouTube series](#), showcasing product development and analytics driven redesign after 47k pageviews.

velagaadvisors.com - Commercial Financial Site

- Designed and built a mobile-optimized website using Next.js and AWS, expanding client reach and improving business engagement.

EDUCATION

Bachelors in Computer Science, University of Texas at Austin, May 2021

Minor in Studio Art
